

IBM* OPERATING SYSTEM/2* (OS/2*) PROGRAMMING TOOLS AND INFORMATION VERSION 1.2/1.3 UPGRADE

Installing the Upgrade

The accompanying diskettes include enhancements to the IBM Operating System/2 (OS/2) Programming Tools and Information Version 1.2. The documentation that is changed as a result of these enhancements is described in the accompanying *Technical Upgrade* manuals. When you install the diskettes, the enhancements are automatically installed.

To install the upgrade:

1. Select **OS/2 Full Screen Command Prompt** from the Group-Main menu.
2. Insert OS/2 Programming Tools and Information 1 diskette in drive A.
3. Enter the following at the command prompt:

```
instaid a:toolkit.pip
```
4. Follow the screen prompts to complete installation of the OS/2 programming tools.

Note: File CUA.DOC residing in [d]:\TOOLKT13\ has been added as part of this update. This text file contains information on how the samples programs should be coded to be CUA-conforming.

For complete information on the installation procedure, see the *Installation* card provided with the original documentation or Appendix A of the *Programming Overview*.

If you encounter problems during or immediately after installing the diskettes, contact your OS/2 Service Coordinator. When you are finished installing the Upgrade, the original OS/2 Programming Tools and Information diskettes become obsolete and should be discarded. Retain the diskettes included in this Upgrade for future use.

This package includes the Program License Agreement for this Upgrade and the OS/2 Version 1.2/1.3 Program License Information booklet for detailed license information.
